

5937 – Galvanised Steel Flexible Exhaust Hose

This is a galvanised steel flexible exhaust hose with a griplock style flexible body. The material allows for a maximum operating temperature of 500°C.

The hose is suitable for most exhaust applications. It has good vibration absorption, low noise attenuation and low thermal expansion. It is also suitable for the transport of materials such as dry bulk goods and powders.

Technical Specifications

Tube	Griplock flexible galvanised steel body
Application	Engine exhaust hose – vibration absorbent, low noise attenuation, low thermal expansion – suitable for dry bulk goods, powders, etc
Temperature Range	Maximum + 500°C
Conforms to	BS 1449
